

# BALKISHAN

Software Engineer

## Career Objective

To showcase my talents and programming skills in an environment of growth and excellence to earn a job which provides me satisfaction and self development which helps me to grow along with the organisation that I work for. And to gain skills that would make me unique.

## Experience

**Mr. Cooper** (2 Years 6 Months)  
September 2017 - Present

Graduate Intern -> Software Engineer Trainee -> Software Engineer 1

Mr. Cooper provides servicing and originations for homeowners throughout the United States, and Xome, which provides technology and data enhanced solutions to the real estate market and companies engaged in the origination and/or servicing of mortgage loans

**Grpdiscount.com** (2 Months)  
December 2015 - January 2016

GRPDISCOUNT.COM is worlds' first and biggest group discount web site to provide huge discount on real estate and cars. Be it in any state/city in India, any type of car model you like GRPDISCOUNT.COM is always there to get you huge savings (up to 10 lakhs) in your pocket

## Roles and Responsibilities

- To develop responsive web application on the given UX requirement
- To write back end services in Spring
- To write test cases with junit tests
- To update the postman collections
- To make a build out of VSTS and deploy it via pipeline

## Projects involved

### Complaint Management System

A complaint management system, used by internal agents to create a case, forward to respective departments, get approvals and resolve the same. 3 tenants using the same application. Around 30K cases created per month. Involves auto resolution scopes. Front end done in React and back end in Spring with Java 11. One of my own feature is the React form which takes in an JSON input and renders the form

### Loan Originating System

A system that helps the agents to get the next tasks out of the bucket and work on them as prioritized. Finally making the system useful for the agents to originate a loan in a short span. The front end is react with express. UI Push notifications using SSE and node event emitter is one of the best feature delivered by me

## Technology Stack

ReactJs

HTML

CSS

node

js

Java

Spring

SQL

## Tools Worked on

Eclipse

Postman

Redis

VSTS

Jenkins

## Cloud Technologies

Firebase

Azure

BPM

## Working Environment

Agile

Scrum

## Interests and Capabilities

Data Structures

Problem Solving

## Languages

Js

Java
